Structural Biology, Genomics Master's degree

Target audience

The TIGER Excellence Scholarship is aimed at international students. The master BSG is open to all students holding a bachelor's degree in the field of Life Sciences or Life and Earth Sciences.

Requirements

The BSG master's degree requires solid knowledge in molecular biology and biochemistry.

Objectives

The BSG master's degree trains students in biology to the necessary skills to work in sciences, in the academic or industrial fields, by allowing them to master approaches in biochemistry, structural biology and genomics.

Specializations

The BSG master's is divided into two learning paths starting from the second semester, but only the Structural Biochemistry (BS) specialization allows students to obtain the TIGER excellence scholarship.

Internships

The master BSG requires two mandatory internships.

7 weeks in a laboratory during the first year

6 months in a laboratory, company, or on a scientific platform during the second year

Armel Kammegne
Student in master BSG benefiting from the TIGER excellence scholarship

“ While I was still in Cameroon, I was accompanied in the various steps, notably for obtaining a VISA. Then, I was very happy to see that upon my arrival, an accommodation had already been assigned to me and a tutor had been appointed. My tutor is also an international student, which made it easier for me to integrate. ”
