Student in master benefiting from the TIGER excellence scholarship

Biological and Biotechnological Engineering

Objectives

The training in Biological and Biotechnological Engineering aims to train high-level engineers, mastering advanced techniques of microbiology, cell biology, genetic engineering and biochemistry.

Specializations

The Biological and Biotechnological Engineering stream of the Polytech Engineer cycle takes place over 3 years (from the 3rd to the 5th year post-baccalaureate). It is possible to join this training in the 3rd or 4th year.

Internships

This specialization requires mandatory internships.

4 to 8 weeks of company discovery during the 3rd year

8 to 13 weeks in a company or laboratory during the 4th year

5 to 6 months in the industry sector during the 5th year

“ While I was still in Cameroon, I was accompanied in the various steps, notably for obtaining a VISA. Then, I was very happy to see that upon my arrival, an accommodation had already been assigned to me and a tutor had been appointed. My tutor is also an international student, which made it easier for me to integrate. ”
